LEGEND OF THE GHOST LION

With a mighty roar, the Ghost Lion descended upon the village. The soldiers tried to protect the peaceful inhabitants, but to no avail. Then, one brave young soldier summoned all his courage and threw his spear at the lion. Startled by the courage of the young soldier, the lion disappeared into a cave at the edge of the village, never to be seen again.

"We must leave on a journey to solve the mystery of the white Ghost Lion." These were the last words Maria heard from her parents. It has been days since they were last seen. After visiting the village elders, Maria realizes that she must go forth to find her parents and unravel the Legend of the Ghost Lion.

You must courageously guide Maria on her journey of discovery.

Control Pad: Used to move Mario and the selection cursor.

SELECT Button: Not used.

START Button: Used to start the game.

A Button: Used to make a selection and to access the Command Menu.

B Button: Used to cancel a selection.

STARTING THE GAME

Insert the Legend of the Ghost Lion Game Pak into the Nintendo Entertainment System and turn on the power. The license screen will appear followed by the Legend of the Ghost Lion title screen.

Press the Start button to begin the game. You will then see a screen that gives you a choice of three files.

Each of the three files can be used to save the progress of three different adventurers. At various points during the game, you will be given the opportunity to record the progress of your quest. Since this is your first adventure, choose FILE 1 by positioning the blinking

triangle cursor next to FILE 1 and pressing the A button.

The next screens present the story of the game.

To see the next part of the story, press the A Button. After the story is presented, you will find yourself in a cave.

THE OBJECTIVE

Your objective is to guide Maria on a journey to find her parents and learn the mystery of the Ghost Lion. You must go forth courageously, holding fast to your hopes and dreams.

MAIN GAME SCREEN

Normally, you will see a view of your location from above. You can use the Control Pad to move Maria on screen. The Command Menu can be accessed by pressing the A button.

The window at the bottom of the screen shows the current number of HOPE, COURAGE, and DREAM points.

HOPE represents the level achieved by Maria. The greater the value of HOPE, the greater her capacity for COURAGE and DREAMS. HOPE is increased by finding fragments of hope that are scattered throughout the land.

COURAGE represents the strength of Maria to continue on her quest.

When Maria's COURAGE points decline to zero, the game ends. COURAGE points can be replenished by finding fragments of hope or by visiting a Spring.

DREAMS represent the capacity of Maria to call upon her companions for assistance. DREAMS are decreased each time Maria calls upon a companion for help. DREAMS can be replenished by finding fragments of hope or by visiting a Spring.

The Command Menu in the upper left of the screen contains four choices:

SPEAK *This command lets you talk to characters and is useful for getting information from friendly characters you encounter. For example, to talk to another character, position Maria in front of the character, press the A button to access the Command Menu, and choose the SPEAK command.*

GOODS This command lets you **USE** or **LEAVE** items you are carrying. After choosing to either **USE** or **LEAVE** items, you are shown a list of the items you are carrying. Choose the item you want by using the Control Pad and pressing the **A** button. Many items, like keys, are only effective when used at the proper location. Be sure to position Maria appropriately before trying to use an item.

Maria can only carry a limited number of items, so it is necessary to carefully choose which items to carry or leave behind.

LOOK Use this command to investigate your surroundings. To examine an item, position Maria near the item and use the **LOOK** command. For example, to open a treasure chest, move Maria so that she is on top of the treasure chest, press the **A** button to access the Command Menu, and choose the **LOOK** command.

VIGOR This command gives you a report on the strength of Maria. When you choose VIGOR, you are given a more detailed report on the HOPE, COURAGE, and DREAM points.

The COURAGE and DREAM points shown at the top of the screen each contain two numbers separated by a "/". The first number shows the number of points that Maria currently has. The second number indicates the maximum number of points that Maria can have.

The RUBY window shows the number of rubies carried by Maria. Rubies can be found in treasure chests or acquired by defeating enemies. They can be used to purchase useful items or services.

By pressing the A button again, you will be shown a list of the spirits available to assist you and their strength. When you begin the game, only Moja, the spirit of the spear is available to help you.

You will acquire additional spirits in the course of your journey.

ENCOUNTERING ENEMIES

You will encounter numerous enemies during your journey.

When this happens, you will be given the choice to FIGHT or RUN.

***FIGHT** If you choose to fight, you are given the option of selecting a tool with which to fight, or to call upon one of the spirits to assist you. If you choose **TOOLS**, you are given a list of the weapons and items you are carrying.*

*If you choose to call upon a spirit, you are given a list of the available spirits. After choosing the spirit, you can choose the action taken by the spirit. These will vary depending on the type of spirit. For example, if you choose **Moja**, the spirit of the spear, you can command him to **FIGHT** the enemy or to **DEFEND** Maria. Other characters, like **Twana**, possess magic and you can choose the spell to be used. If there are multiple enemies in the battle, you can then choose which enemy is to be acted upon.*

Battles take place in turns. During each turn, you can specify the actions of Maria and her companions. The results of the battle are given on screen. Remember that when Maria's COURAGE reaches zero, the game is over!

RUN *Rather than fight, you can choose to run away from the enemy. This can be useful to conserve your strength, but it is not always successful.*

You will find that some spells are more effective than others against particular enemies, so choose wisely!

You can choose to record the progress of your game by visiting a Spring.

Similarly, you can resume your adventure at a later date by choosing the file under which your adventure was recorded.

After choosing the file, you can choose from the following options:

Continue: Resume your game from the point where it was last saved.

Exit: Go back and choose a different file.

HINTS FOR THE ADVENTURER

Be sure to talk to the friendly characters you encounter. They are an excellent source of information and will sometimes give you useful items.

Save the progress of your game frequently by visiting a Spring. Besides recording your journey, this will replenish your COURAGE and DREAMS.

MAP MAKING TIPS

Map Making is essential to make sure you go everywhere and do everything in the game, as well as helping you from getting lost.

Here are some tips for making useful maps:

- *Get yourself a good pencil (with a big eraser) and a pad of graph paper (we suggest 1/4" x 1/4" grids).*
- *Make your maps to scale. For example; 1 square on the graph paper is equal to 1 step of your character on the game screen.*
- *Draw what you see. The maps only have to make sense to you; they don't need to be works of art!*

Good maps are very important tools for any serious RPG players. Practice map making and you'll find that you'll be a very successful adventurer. Remember to always keep your Hope, Dreams and Courage alive! Good Luck!
